3.2.1 Institution has created an ecosystem for innovations and has initiatives for creation and transfer of knowledge.

Every department of the institute has an "Adhyayan Mandal," through which it organises various programmes related to the subject by organising lectures by renowned speakers and experts from various educational, social, and cultural institutions in that field. Adhyayan Mandals of various departments involve undergraduate as well as postgraduate students who work on the committees formed by the departments. Most of the work done under these Mandals involves the active participation of the students, right from arranging the programmes to effectively conducting them. This helps the students gain experience in the conduct of programmes in the institute and develop leadership qualities as they get a chance to work under their teacher's guidance and also get a platform where they can use their management qualities.

Workshops, seminars, and conferences are organised by the various departments of the institute, which initiate the transfer of knowledge. In the academic year 2021–22, the Institute organised workshops on IPR, soft skills, life management, FDP, etc. in collaboration with other institutes within and outside the state. Besides, this Department of English took up a good cause to teach basic English grammar to the children residing in slum areas near the college.

The faculty members of the institute are invited by various institutes for their expertise in their fields. They are invited as guest speakers and resource persons to various seminars, conferences, and workshops. This is an initiative by the Institute for the creation and transfer of knowledge.

The expertise and contributions of the faculty members are recognised by various educational and social institutions. They are invited as chairpersons, keynote speakers, judges, and artists in various concerts.

The institute takes pride in mentioning that faculty members are conferred various national awards for their contributions in the fields of education, research, social work, etc. Some of the faculty members also actively participate in the newspapers as columnists, which helps in the transfer of knowledge about their subjects to the common people.
