Student Satisfaction Survey Report 2023-2024

To conduct a Student Satisfaction Survey in Institute, we design a questionnaire consisting of questions which are answered by the students. A usual set of 10 questions are taken among that nine questions are objective questions which having MCQ format based on teaching and learning evaluation, how facilities are provided to students by the institute, their participation in extracurricular activities, skill development and active involvement in NCC and NSS. The evaluation is transparent and assists the institute in further development. The main focus of the questions is based on quality in teaching and learning processes provided in the institute. The questions reflect on the facility benefits to the students.

Questions were also focused on overall qualities of teaching learning processes in our institute. Many questions were asked on the facilities, benefits to the students and usage of facilities in teaching-learning.

Institute prepared a Google form for SSS to carry out online survey in 2023-24. Graphical representation of SSS is as follows:

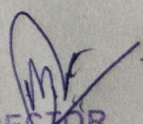

After considering the responses of the SSS given by the students, average percentage of answers to all questions was found.

Total responses received were 436. There were 9 questions per questionnaire. So total 3924 answers were received

The average of very good and good options that were chosen was 83.31%.

The total percentage of responses of satisfied and unsatisfied student's survey was 16.69 %. Due to this our institute makes efforts to increase quality of education based on the responses. Suggestions made by the students in the last question were taken into consideration and implemented for betterment of quality of our institution.
